

HSM V-Press 60

***The manual baling press
for manufacturers and retailers***

Compression of bulky packaging material right where the waste accumulates.

Every day, large amounts of waste material have to be disposed of, which involves time-consuming interim storage and removal. The HSM V-Press 60 can help: this agile, manual baling press compresses foils and lightweight packaging material (paper, cardboard) right where the

material is. It is a mobile, practical waste disposal station and saves up to 50% of your disposal costs. The HSM V-Press 60 is designed for use in retail, manufacturing or logistics companies.

The benefits in detail:

- **Savings of up to 50% on waste costs**

On average, all costs associated with collecting, storing, transporting and disposing of packing material are halved.

- **Compression of 5:1 and more**

The lever action allows the HSM V-Press 60 to produce well-compressed, stackable bales.

- **Mobile**

Move the HSM V-Press 60 to where the waste is produced. It fits through every door and in every lift!

- **Workplace kept clean**

The used packing material is fed into the HSM V-Press 60 immediately after unpacking and does not need to be transported to interim storage.

- **User-friendly**

The HSM V-Press 60 is effortless to operate with a minimum amount of strength.

- **Low-maintenance**

The HSM V-Press 60 has no electric or hydraulic components. This means the V-Press 60 does not need any electricity, servicing or maintenance.

- **Environmentally-friendly**

Better truck loading with HSM bales, and fewer trips by truck as a result.

- **Precompactor for hydraulic baling presses**

The bales produced by the HSM V-Press 60 can be re-pressed in hydraulic HSM baling presses, i.e. compressed into denser and larger bales.

HSM V-Press 60

approx. 0,4 m³

Compact bales made easy:

The HSM V-Press 60 compresses plastic foils, plastic and paper bags as well as lightweight boxes and packing paper.

The material for compression is placed in the HSM V-Press 60 right where it accumulates. No more interim storage required.

The lever mechanism allows the material to be compressed with a minimum amount of strength.

The bales of approx. 40 kg can be stacked and are easy to transport.

**Optimise your waste disposal logistics
with the HSM V-Press 60!**

HSM V-Press 60 – technical data

Model	HSM V-Press 60
Loading aperture W x D in mm	740 x 635
Loading height in mm	1015
Bale weight in kg (depending on material)	Up to 40
Bale size L x W x H in mm	800 x 600 x max. 800
Dimensions of machine W x D x H in mm	810 x 735 x 1280
Machine weight in kg	95
Strapping	3-fold crosswise with strapping twine

All technical data and dimensions are approximate values only. Technical and design changes reserved.

*The bales can be re-pressed on
a hydraulic press.*

HSM – the company

Cutting, shredding, compressing

Since 1971, HSM has been pursuing a clear strategy – a consistent commitment to quality “Made in Germany”. This product and service quality is the key to success in both the office technology and environmental technology business sectors. As a specialist for products and services for data protection as well as technologies for optimising logistics and recycling processes, HSM is one of the world’s leading providers.
