

HSM HL 3521 S

HSM HL 3521 S

The HL 3521 S has been especially designed for compressing strongly expanding material such as foam. With a powerful 22 kW drive, very large loading aperture and manual 6-fold strapping with Quick-Link wire, this machine is perfect for compressing difficult materials. Of course, other packaging materials can also be compressed.

- The full stroke of the press ram ejects the bale completely
- Stored-program controller PLC
- High levels of compression are ensured by optimally dimensioned retaining claws
- Optimum operation ensured by the return stroke of the press ram
- Hydraulic loading flap for maximum operating comfort and for precompressing
- Safeguarding of the operating area with infrared light curtains
- The unique design and controllable positioning of the press ram allow for easy cleaning and servicing

Product type description	HSM HL 3521
Order number	6243214
Driving power	22 kW
Voltage	400 V
Frequency	50 Hz
Weight	4500 kg
