

HSM PET Crusher 1049

HSM PET Crusher 1049

The HSM PET Crusher can be combined with all standard deposit return machines. By combining it with a return machine, it forms a main collection unit which provides customers with receipts for their returned PET bottles and cans, destroys the containers and reduces them in volume. If you want to collect PET bottles and cans separately, a deposit return machine can be equipped with two HSM PET Crushers, which each compresses only one type of container.

Product type description	HSM PET Crusher 1049
Order number	PET Crusher 1049
Working width	490 mm
Version	CRUSHER
Bottle diameter	50 - 120 mm
Throughput capacity (1 litre bottle)	2000
Driving power	1,6 kW
Voltage	230 V
Frequency	50 Hz
Depth	1400 mm
Width	930 mm
Height	1600 mm
Weight	196 kg
